

# Preparation of Materials for Environmental Coordination by “Modulization” of Natural Zeolite via Ceramic Processing Method

## Development of Basic Techniques

※Deposition and Fixing of Natural Zeolite Particles on Metal Substrate

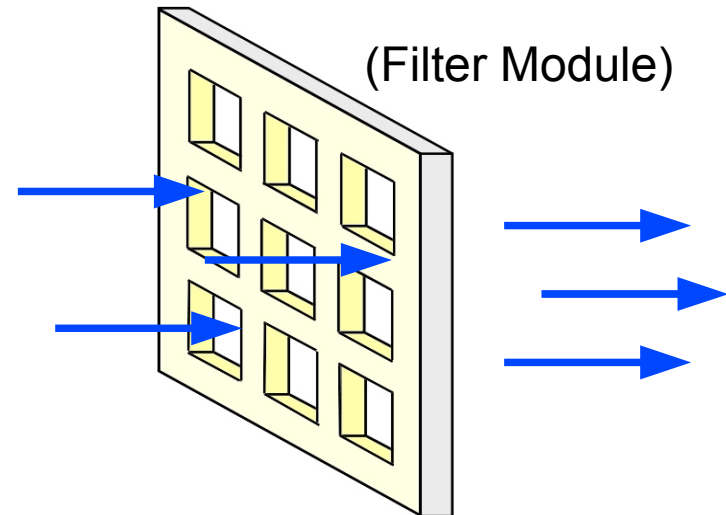

Film-like Deposit of Natural Zeolite Particles

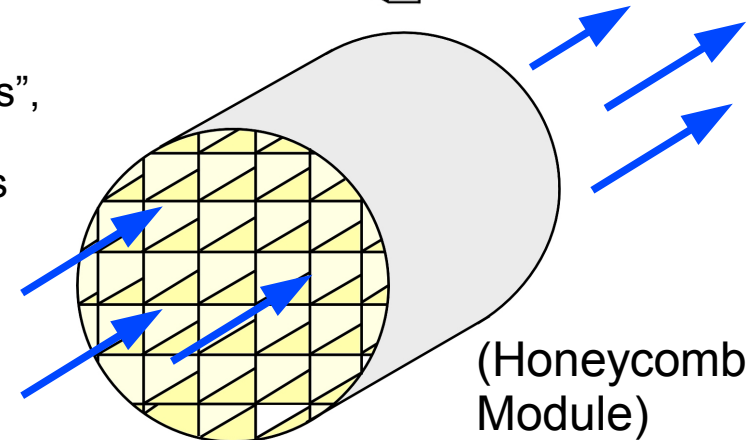

## Development of Application

※Preparation of Various Shapes of “Zeolite Modules”, Holding Natural Zeolite Particles on Their Surfaces

(Filter Module)

(Honeycomb Module)

**Application to Environmental Cleaning**  
by Adsorption of Harmful Materials  
from Water and/or Air at High Efficiency
